

# The Gettysburg Collection of Old-Time Fiddle Tunes

by John S. Lamancusa  
Third Edition – February 2022

I found authentic Old-Time music in the back room of a real estate office in Gettysburg, PA. Since colonial times, Gettysburg has been a geographic and cultural cross-roads. Located just 10 miles north of the Mason-Dixon Line, it witnessed the titanic collision of Civil War armies that caused over 50,000 casualties. In more recent times (from 2005 until COVID), it has been the site of a monthly Old-Time music jam that attracted musicians from WV, VA, MD, PA and DC to share tunes, jokes, baked goods and liquid refreshment.

To get my music fix, I would drive 120 miles from State College, over winding two-lane roads, through historic towns like Mt. Union, Orbisonia, Shirleysburg, Burnt Cabins, Fort Littleton, Fort Loudon and Chambersburg. My route (on US522) re-traced the path of the white settlers who brought the first fiddles and banjos, and unsettled the native Lenape tribe. When I first attended the jam, I did not know the local repertoire, but I would make recordings, transcribe the tunes and practice at home before the next session. Those notations would become the foundation of a website and this collection.

This book contains 522 traditional old-time tunes, transcribed from many different jams (including Gettysburg), source recordings, festivals (Clifftop, Rock Bridge), and workshops (Rocky Mountain Fiddle Camp, Swannanoa, Augusta, Fiddle Hell). I hope you enjoy this collection that has taken over 20 years to complete. I have tried to make each tune easy to read without requiring a page turn, including chords, time signatures and bar lines. Please bear in mind that a well-played tune cannot be fully captured on a written page. It is impossible to notate all the possible nuances, variations, double-stops, bowings and rhythms of old-time fiddling. To avoid visual clutter, I have (mostly) omitted bowings, drones and double stops, leaving the player to fill in the finer points after listening to the source recordings.

These notations are intended as guidelines, not gospel. Old-time music is not Bach, where every note must be played and bowed as written or else it is “wrong”. The great fiddlers do not play a tune the same way every time, and two fiddlers seldom agree on the same version, even of “traditional” tunes. There can be similar debates about keys, chords, and which part comes first. In my opinion, if you bring this book to a jam and merely sight-read, you are missing out on the old-time experience. When the eyes are fully engaged, the ears are not. There is no substitute for careful listening, repetition, playing along and repetition. You don’t really know a tune until you have forgotten it at least 3 times.

I would like to thank Freya Qually, the long-time host of the Gettysburg jam, and all the wonderful folks who welcomed me to into their music community, for making this collection possible.

Sincerely,  
John Lamancusa
